

# DIGIPASS for Mobile Enterprise Security Edition

One-Time Passwords with no additional hardware needed, and no hassle

DIGIPASS for Mobile Enterprise Security Edition is the easiest way of using strong authentication on portable devices within your company. No hardware needed, no SMS gateway to set up and no download server to maintain: VASCO offers a secure provisioning service which will handle the logistics part, so you can concentrate on your business.

## EASY TO DEPLOY

Strong authentication has never been easier to deploy than with VASCO's off-line provisioning service.

### STEP 1:

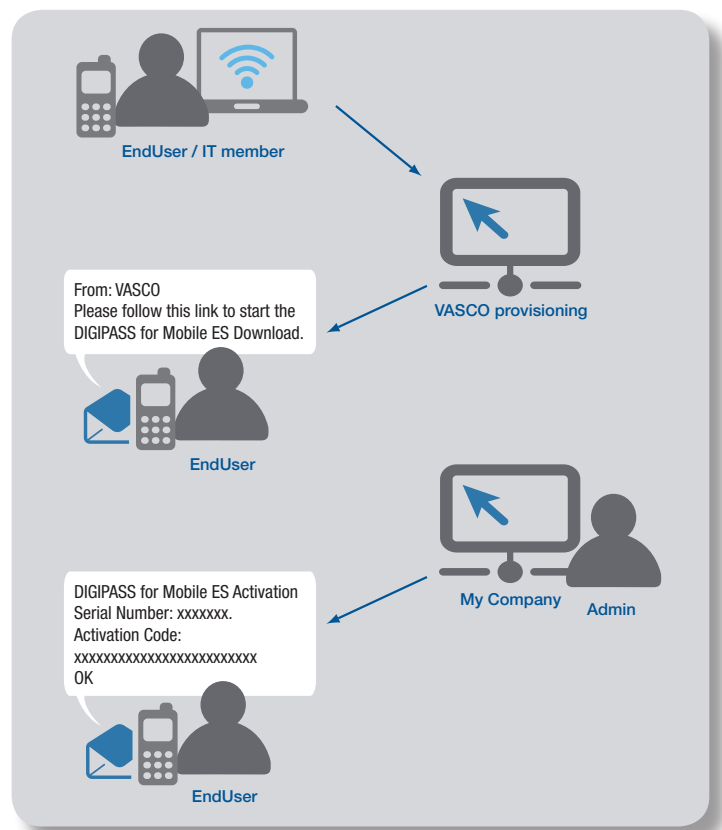

Your end-user connects to VASCO DIGIPASS for Mobile Server and provides his mobile phone number.

### STEP 2:

The end-user receives an SMS message containing a link to download DIGIPASS for Mobile Enterprise Security Edition.

### STEP 3:

Once it has been downloaded to his device, the end-user simply has to provide the activation information provided by the IT department.

## SECURITY AT ANY TIME

DIGIPASS for Mobile Enterprise Security Edition (DP for Mobile ES) provides two-factor authentication (time and event based) to address the security risk posed by online applications. This strong authentication method is considered the most effective defense against complex cyber attacks and complies with the latest regulations, including FFIEC guidelines.

Besides the time and event based authentication application, DIGIPASS for Mobile ES also provides a time-synchronizing service. A daylight saving adjustment feature is embedded so that frequent travellers are able to use their DIGIPASS for Mobile without any restrictions.

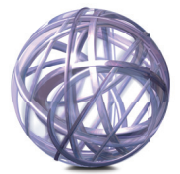

## ACCEPTANCE

Your end users will be free to do business securely from a mobile device while travelling anywhere in the world. They don't need to carry an additional device, and no end user training is needed.

## COMPATIBILITY

Hundreds of handsets from different mobile phone manufacturers have been formally tested, and Java phones and Blackberry devices are also supported.

DIGIPASS for Mobile ES is also compatible with all VASCO technologies (VACMAN Middleware, IDENTIKEY Server, aXsGUARD etc.).
