

DIGIPASS GO 5

Time / Event-Based Strong Authenticator

DIGIPASS GO 5 is a strong authentication device that boosts security while providing unmatched user acceptance. Waterproof, robust, and affordable, DIGIPASS GO 5 is a perfect choice for large and small organizations looking to make a cost-effective investment in online security.

LARGE YET COMPACT DESIGN

DIGIPASS GO 5 is a slightly larger, yet compact, version of the popular GO 3 model, with a larger display and larger digits. It was designed for organizations requiring a robust, user-friendly device that also provides a larger area for logo customization.

DIGIPASS GO 5 is a one-button dynamic password generator built with VASCO's proven One-Time Password technology. Organizations can effectively combat online fraud by replacing static password logons with dynamic passwords generated by DIGIPASS GO 5.

IMPROVED USER ACCEPTANCE

DIGIPASS GO 5 is extremely easy to use. The user simply presses a button to generate a One-Time Password (OTP) to remotely log into an application, website, or network. Its robust design and easy-to-read- display also contribute to the high level of user acceptance.

MORE OPPORTUNITIES FOR CUSTOMIZATION

The elegant design of DIGIPASS GO 5 can be enhanced with your corporate logo and custom colors. A transparent lens protects the graphic from normal wear and tear. Additionally, DIGIPASS GO 5 offers a slightly larger area for customization compared to some other devices of the GO series.

COST-EFFICIENCY

DIGIPASS GO 5 is fully interoperable with all members of the DIGIPASS family and works seamlessly with VASCO's VACMAN or IDENTIKEY authentication service products, as well as with over 50 VASCO partner applications. With DIGIPASS GO 5 end user devices and VACMAN / IDENTIKEY backend authentication products, organizations can economically deploy a comprehensive, scalable, high performance two-factor authentication solution.

PROVEN TWO-FACTOR AUTHENTICATION TECHNOLOGY

VASCO's technology provides an advanced, yet simple, defense mechanism against unauthorized access and password theft. DIGIPASS GO 5 (something you have), in combination with a PIN (something you know), enables organizations of all sizes to safely identify customers, vendors, and employees who are trying to access their network resources.

FUNCTION

- Remote user and remote host authentication

FEATURES

- Larger display with larger digits compared to other GO products
- Compact, sleek design
- Battery life 7+ years
- Waterproof - sealed tightly to protect against dust and moisture
- One-button OTP generation
- Time or event-based algorithms
- Customizable OTP length, OTP refresh frequency (for time-based algorithms) and welcome message
- Easily customized with corporate logos and colors

BENEFITS

- Robust, waterproof design increases life expectancy
- Reduced device replacement costs due to longer battery life
- Easy to use; consequently minimal training, low start-up costs and high user acceptance
- Easy to deploy
- Low total cost of ownership

TECHNICAL SPECIFICATION

Weight: 19 grams

Dimensions: 11 x 40 x 62 mm

Display: high contrast 8-character LCD

Keypad: one-button

Real-time clock to provide time value for DIGIPASS algorithm

Supported crypto algorithms: DES, 3DES and AES

Supported algorithms:

- DIGIPASS time- and event-based
- OATH time (TOTP) and event-based (HOTP) - on demand

Battery: non-replaceable, life time expectancy 7 years

CERTIFICATION AND COMPLIANCE

Storage temperature	-10° C to 50° C; 90% RH non condensing	IEC 60068-2-78 (damp heat) IEC 60068-2-1 (cold)
Operating temperature	0° C to 45° C; 85% RH non condensing	IEC 60068-2-78 (damp heat) IEC 60068-2-1 (cold)
Water resistance	Waterproof IPx7 (1 meter during 30 min)	ISO 60068-2-18 or IEC 60529
Vibration	10 to 75 Hz; 10 m/s ²	IEC 60068-2-6
Drop	1 meter	IEC 60068-2-32
Emission		EN 55022
Immunity	4 kV contact discharges 8 kV air discharges 3 V/m from 80 to 1000 MHz	EN 55024
Compliant with European directives	<ul style="list-style-type: none"> • CE: 89/336/EEC or 2004/108/EC • RoHS: 2002/95/EC • WEEE: 2002/96/EC 	

About VASCO

VASCO designs, develops, markets and supports patented DIGIPASS®, DIGIPASS PLUS®, VACMAN®, IDENTIKEY® and aXs GUARD® authentication products for the financial world, remote access, e-business and e-commerce.

With tens of millions of products sold, VASCO has established itself as the world leader in Strong User Authentication for e-Banking and Enterprise Security for blue-chip corporations and governments worldwide.
