

# DIGIPASS® GO 1

***Strong authentication has never been so ultra-portable and so ultra-easy to use!***

For security in applications and networks, user acceptance is absolutely crucial. Balance that against the need for an affordable solution that is very easy to use. The Digipass Go 1 provides all that in an attractive, smooth design. What's more, it can be carried easily in a pocket, on a keyring or clipped to a belt for true "anywhere, anytime, anyhow" security.

Digipass® Go 1

## ***Easy to use***

The Digipass Go 1 offers the ultimate in user-friendly high security. With a simple click users open the Digipass Go 1 and receive a unique one-time password on a high contrast LCD display. All they need to do is read it and key it into their application – wherever they may be. So it can be combined with different platforms, including PCs, telephones, Internet kiosks and mobiles phones.

## ***Easy to deploy***

The Digipass Go 1 is rapidly integrated into existing networks. So any static password in an application can be replaced with the more secure Digipass Go 1 dynamic password. Once the unit is programmed and handed over to the user, they

no longer need to call on the network manager. The user cannot lock the Digipass Go 1, as the PIN is not entered on the unit. Its normal battery lifetime of 5 years offers a very high return of investment. And if required, the Digipass Go 1 can even be reprogrammed with new keys and/or algorithms.

Digipass Go 1 is fully interoperable with all members of the Digipass family and works seamlessly together with the VACMAN server and over 50 application vendors to ensure deployment at the lowest total cost of ownership.

## ***Security within everybody's reach.***

Not all security measures require sophisticated procedures with multiple fields to be entered. When strong authentication is enough, e.g. in corporate networking or remote access to banking information, users more readily accept simpler devices. When the design is stylish and the user is given the final choice of how to use it, then half of the acceptance battle is won. Digipass Go 1 offers the user the choice between carrying it in a pocket, around his or her neck for moving within

the company, on a keyring so as not to forget it in the morning or clipped to a belt like a mobile phone. So user acceptance is considerably enhanced, and network management intervention is reduced to the strict minimum

## Features:

- Comes complete with all required accessories to be worn in a pocket, around the neck, on a keyring or on a belt.
- Only 18 grams
- Size: 15 x 35 x 68 mm (H x W x L)
- 6/ 8-character LCD display
- Activated when window is slid open
- DES or 3-DES
- On board real time clock
- Encryption can be:
  - Time synchronous
  - Event synchronous
  - Time and event synchronous
- Can be combined with a PIN entry on a PC
- Expected lifetime of the battery: 5 years
- Compatible with the Digipass family members
- Can be programmed with the Digipass Programmer and Digilink or can be delivered fully programmed.
- Compatible with over 50 major application software vendors.
